- **Majors named:** Electrical Engineering, Computer Engineering
- **Degree and experience:** Pursuing a degree in electrical or computer engineering or related field; programming knowledge; PLC familiarity a plus.

Skills mentioned

Communication · Problem solving & root cause · Automation & controls

Full posting text

Toshiba International Corporation is a world leader in the design and manufacture of motors, motor controls and power electronics products. Many of these products are designed, built and tested in our 1,000,000 square foot state-of-the-art manufacturing facility in Houston, TX. We have developed a totally integrated manufacturing process from research and development, design, engineering, production and manufacturing to after-market service and sales & marketing. Toshiba differentiates itself from its competitors through its commitment to quality and reliability. We build products to perform in the most difficult conditions. From raw material to the finished product, we assure exacting quality, engineering excellence and stringent testing to meet domestic and international performance standards.

Job Summary

We’re looking for an Electrical/Computer Engineer Intern to help develop standard micro PLC and HMI programs that will be packaged and sold with hardware solutions. This role also supports creating clear, engaging training

content—including YouTube tutorials and PowerPoint modules—for internal teams and customers.

Responsibilities

- Develop and test standard micro PLC and HMI programs for packaged automation products.
- Create HMI screens, templates, and documentation.
- Produce training materials, including YouTube videos and PowerPoint presentations.
- Assist with hardware testing, troubleshooting, and program validation.
- Support engineering teams with updates, documentation, and customer■focused technical materials.

Requirements

Pursuing a degree in Electrical Engineering, Computer Engineering, or a related field.Strong communication skills and ability to explain technical concepts simplyComputer programming language knowledge and skillFamiliarity with PLC's and control system concepts is a plus
