Who We Are:Delta, founded in 1971, is a global leader in switching power supplies and thermal management products with a thriving portfolio of smart energy-saving systems and solutions in the fields of industrial automation, building automation, telecom power, data center infrastructure, EV charging, renewable energy, energy storage and display, to nurture the development of smart manufacturing and sustainable cities. As a world-class corporate citizen guided by its mission statement, “To provide innovative, clean and energy-efficient solutions for a better tomorrow,” Delta leverages its core competence in high-efficiency power electronics and its ESG-embedded business model to address key environmental issues, such as climate change. Delta serves customers through its sales offices, R&D centers and manufacturing facilities spread over close to 200 locations across five continents. Delta has 158 sales offices, 72 R&D centers and 48 manufacturing facilities worldwide.

Throughout its history, Delta has received various global awards and recognition for its business achievements, innovative technologies, and dedication to ESG. Since 2011, Delta has been listed on the DJSI World Index of Dow Jones Sustainability™ Indices for 11 consecutive years. In 2021, Delta was also recognized by CDP with leadership level ratings for its substantial contribution to climate change and water security issues and named Supplier Engagement Leader for its continuous development of a sustainable value chain.

What you will be Doing:This role will be involved in forecasting of revenue growth in writing and production test programs for electronic circuit design, basic digital circuitry and electronic test equipment.Responsibilities:1. Producing test jigs and writing test programs.2. Evaluating and verifying engineering design/factory process alteration.3. Planning/evaluating/verifying/tracking new product DFt.4. Analyzing product trial production and mass production line problem countermeasures.5. Installing test equipment of engineering/production line and planning for Burn-in.6. Verifying and confirming TS (test notes) and TE test items.7. Verifying the product and completing the test plan and test report.8. Confirming the PWB test point.9. Analyzing RFQ and planning test methods for new products.

- What we require (Skills and Background):Minimum Bachelor’s Degree in Electrical Engineering, Electronics, or a related field; Or associate degree in Electronics with Equivalent years’ experience in a related field.1 plus years of testing engineering experience including writing test programs and verifying and confirming TS and TE test items.
- Strong verbal and written communication skills.
- Demonstrated strong analytical and problem solving skills.
- Circuit analysis, bench level equipment skills, and report writing.
- Ability to work using schematic diagrams, written and verbal descriptions or layouts to perform testing and trouble-shooting functions.

What you will experience at Delta:You will be joining one of the world’s leaders in technology as they grow their presences in North America. This role offers a competitive salary package, comprehensive benefits, and the opportunity to work with a dynamic team in a fast-paced and innovative environment. If you are a self-starter with a passion for technology and a commitment to customer satisfaction, this is the job for you.
