Test Engineer

Molex · Georgetown, TX

Job ID (this archive)	MFG-016
Employer	Molex
Location	Georgetown, TX
Career stage	New grad / early career
Location group	Texas (outside DFW)
Major (archive tag)	Computer Engineering
Sector area	Quality, materials & process engineering
Industry (LinkedIn)	Appliances, Electrical, and Electronics Manufacturing
Pay listed	Not listed
Stated rules	U.S. citizen / ITAR
Posted / closes	2026-10-20 · 2026-11-28
Status when checked	Accepting applications on LinkedIn (Nov 1, 2026)

At a glance

What you would do

Engineer planning and running validation tests on cable harnesses and assemblies, building test fixtures, analyzing data, and investigating product failures.

Who can apply

- **Majors named:** Electrical Engineering, Mechanical Engineering, Electronics Engineering, Engineering Technology
- **Degree and experience:** Bachelor's in a listed engineering field or related; 2+ years in product testing, validation, reliability, or quality.

Skills mentioned

Teamwork & collaboration · Communication · Problem solving & root cause · Automation & controls · Safety · Lean / Six Sigma / continuous improvement · Programming · Cybersecurity & OT security

Your Job

Molex is seeking a Test Engineer to support the development, validation, and qualification of advanced interconnect, cable assembly, and electronic solutions. This role will be responsible for designing and executing test plans, developing test fixtures and methods, analyzing results, and collaborating with cross-functional engineering teams to ensure product performance, reliability, and compliance with customer and industry requirements. The Test Engineer will play a critical role in supporting new product development, manufacturing readiness, and continuous improvement initiatives.

Our Team

You will join the ADS Engineering team, partnering closely with Product Design, Manufacturing Engineering, Quality, Reliability, and Operations teams. The team focuses on delivering innovative solutions while ensuring products meet performance, quality, and customer expectations through robust testing and validation processes.

What You Will Do

Develop and execute product verification and validation test plans for new and existing products. Design, build, and maintain test fixtures, equipment setups, and automated test systems. Develop and validate electrical test methods for cable harnesses and assemblies, including continuity, resistance, insulation resistance, dielectric withstand voltage (DWV/Hi-Pot), and ESD testing, in accordance with customer, industry, and internal specifications. Analyze test data and provide clear technical reports, recommendations, and corrective actions. Collaborate with product development teams to troubleshoot design and manufacturing issues. Develop, revise, and maintain test procedures, work instructions, and test department documentation. Support qualification activities including DVP&R execution, test reporting, and design reviews. Investigate product failures, conduct root cause analysis, and recommend corrective actions. Ensure test department and manufacturing test equipment is properly maintained, calibrated, validated, and operating effectively. Participate in continuous improvement initiatives focused on test efficiency, automation, quality, and cost reduction. Support customer inquiries, audits, and technical reviews as needed. Maintain compliance with safety, quality, and regulatory requirements.

Who You Are

Basic Qualifications

Bachelor's degree in Electrical Engineering, Mechanical Engineering, Electronics Engineering, Engineering Technology, or a related technical field. 2+ years of experience in product testing, validation, reliability, quality, or related engineering functions. Experience using electrical test equipment such as Cirris cable and harness testers, dielectric withstand voltage (DWV/Hi-Pot) and insulation-resistance testers, ohmmeters, digital multimeters (DMMs), LCR meters, oscilloscopes, programmable power supplies, electronic loads, data acquisition systems, ESD test and monitoring equipment, and automated manufacturing test systems. Strong analytical and troubleshooting skills. Ability to interpret engineering drawings, specifications, and test requirements. Experience with Microsoft Office applications and technical report writing. Strong communication and collaboration skills.

What Will Put You Ahead

Experience with cable assemblies, connectors, high-speed interconnects, or data communication products. Experience with automated test development, LabVIEW, Python, MATLAB, or similar tools. Knowledge of electrical, reliability, and environmental testing, including continuity, insulation resistance, dielectric withstand voltage (DWV), and applicable IPC-620, EIA, MIL-STD standards. Experience with Design Verification Plan & Report (DVP&R) methodologies. Experience supporting new product introduction (NPI) and manufacturing qualification activities. Lean Manufacturing, Six Sigma, or continuous improvement experience.

At Koch companies, we are entrepreneurs. This means we openly challenge the status quo, find new ways to create value and get rewarded for our individual contributions. Any compensation range provided for a role is an estimate determined by available market data. The actual amount may be higher or lower than the range provided considering each candidate's knowledge, skills, abilities, and geographic location. If you have questions, please speak to your recruiter about the flexibility and detail of our compensation philosophy.

Hiring Philosophy

All Koch companies value diversity of thought, perspectives, aptitudes, experiences, and backgrounds. We are Military Ready and Second Chance employers. Learn more about our hiring philosophy here.

Who We Are

As a Koch company, Molex is a leading supplier of connectors and interconnect components, driving innovation in electronics and supporting industries from automotive to health care and consumer to data communications. The thousands of innovators who work for Molex have made us a global electronics leader. Our experienced people, groundbreaking products and leading-edge technologies help us deliver a wider array of solutions to more markets than ever before.

At Koch, employees are empowered to do what they do best to make life better. Learn how our business philosophy helps employees unleash their potential while creating value for themselves and the company.

Our Benefits

Our goal is for each employee, and their families, to live fulfilling and healthy lives. We provide essential resources and support to build and maintain physical, financial, and emotional strength - focusing on overall wellbeing so you can focus on what matters most. Our benefits plan includes - medical, dental, vision, flexible spending and health savings accounts, life insurance, ADD, disability, retirement, paid vacation/time off, educational assistance, and may also include infertility assistance, paid parental leave and adoption assistance. Specific eligibility criteria is set by the applicable Summary Plan Description, policy or guideline and benefits may vary by geographic region. If you have questions on what benefits apply to you, please speak to your recruiter.

Additionally, everyone has individual work and personal needs. We seek to enable the best work environment that helps you and the business work together to produce superior results.

Equal Opportunities

Equal Opportunity Employer, including disability and protected veteran status. Except where prohibited by state law, some offers of employment are conditioned upon successfully passing a drug test. This employer uses E-Verify. Please click here for additional information. (For Illinois E-Verify information click here, aquí, or tu).

In order to comply with U.S. export control laws and regulations, this position requires applicants to either provide proof of U.S. citizenship or lawful permanent resident status or be eligible to receive an export authorization (a license) under the International Traffic in Arms Regulations and/or the Export Administration Regulations.
