At a glance

What you would do

Engineer evaluating and integrating automation, robotics, and digital tools in a semiconductor fab, writing vendor specifications and data workflows.

Who can apply

- **Majors named:** Mechanical Engineering, Electrical Engineering, Chemical Engineering, Environmental Engineering, Computer Science
- **Degree and experience:** Bachelor's in a listed engineering field or CS; 3+ years software/automation experience incl. 2+ years in high-tech manufacturing.

Skills mentioned

Communication · Automation & controls · Safety · Cybersecurity & OT security

Full posting text

A career at TSMC Arizona offers an unparalleled opportunity to contribute to the most advanced semiconductor fabrication facility in the United States. TSMC Arizona's first fab began production with leading-edge N4 process technology in the first half of 2025. The second and third fabs, utilizing even more advanced process technology, will start production by 2028-2030. America's leading technology companies will rely on TSMC Arizona for the next generations of chips that will power the digital future.

Job Description TSMC Arizona is looking for a Digital Integration & Automation Engineer (Technical PM) to join our team located in Phoenix, Arizona. As a Digital Integration & Automation Senior Engineer, you will demonstrate a strong sense of

reliability and enthusiasm and will possess an attitude that embodies our core values – Integrity, Commitment, Innovation and Customer Trust.

The Digital Integration & Automation Senior Engineer is responsible for leading the implementation of smart factory technologies, automation workflows, and robotics systems. Our systems are designed to run 24 hours a day, 365 days a year without interruption, creating a state-of-the-art manufacturing environment.

Digital Integration & Automation Engineers work closely with manufacturing, facility teams, suppliers and vendors daily to understand systems reliability and quality concerns and work to resolve issues.

Responsibilities

The successful candidate will possess the following:

- Solution Deployment: Evaluate, pilot, and integrate digital solutions, automated systems, and robotics to improve operational efficiency.
- Technical Specifications: Translate operational bottlenecks into concrete technical requirements and draft RFPs/specifications for vendor bidding.
- Compliance & Security: Partner with internal IT, Cybersecurity, and Safety (EHS) teams to ensure all systems successfully pass compliance and change management (MOC) reviews.
- Process Automation: Design automated workflows, script data integration pipelines, and support real-time data visualization.
- Operational Enablement: Build clear, simple guidelines to ensure smooth adoption of new systems by on-site operations teams.

Minimum Qualifications/Requirements

Education:Bachelor’s degree in Mechanical, Electrical, Chemical, Environmental Engineering, Computer Science, or a related technical field.Technical Skills:At least 3 years of software or automation engineering work experience with 2+ years of hands-on experience in systems integration, engineering project management, or automation deployment within high-tech manufacturing.

Preferred Qualification

- Interpersonal Skills:A proactive, self-driven mindset with a strong track record of identifying and solving operational bottlenecks independently.
- Ability to translate complex technical concepts into clear, actionable logic for both operators and executives. Effective oral and written communication skills.
- Demonstrated ability to quickly master unfamiliar hardware/software systems and technical documentation.

Physical Requirements

- Primarily an office-based role requiring the ability to sit for extended periods of time while working at a computer.
- Ability to use a computer, keyboard, mouse and other standard office equipment for prolonged periods of time.
- Ability to occasionally stand, walk, reach, bend, and carry light objects.
- May require occasional travel to company sites or other meetings that involve walking through office, industrial or construction environments.

Training

Candidates may need to go to Taiwan for training depending on business needs.

Shift expectations

Candidates are expected to work on standard work hours, Monday-Friday 8am – 5pm or 9am – 6pm

Application Consideration Consent: By applying to this position, I acknowledge and agree that my application and qualifications may be considered for other roles within the company. However, I reserve the right to withdraw my consent for future consideration of other roles within the company at any time.

Candidates must be willing and able to work on-site at our Phoenix Arizona facility.

Benefits

As a valued member of the TSMC family, we place a significant focus on your health and well-being. When you are at your best—physically, mentally, and financially—our company thrives. TSMC offers a comprehensive and competitive benefits program that includes:

- Medical, Dental, and Vision Plans: Choose the options that best fit your and your family's needs.
- Income-Protection Programs: Financial assistance during injury or illness.401(k) Retirement Savings Plan: Secure your financial future with competitive employer contributions.
- Paid Time-Off Programs and Holidays: Recharge and spend quality time with loved ones.

Work Location: 5088 W. Innovation Circle, Phoenix, AZ 85083

TSMC is an equal opportunity employer. We celebrate diversity and are committed to creating an inclusive environment for all employees. All qualified applicants will receive consideration for employment without regard to race, color, religion, age, sex, sexual orientation, gender identity, national origin, disability, veteran status, or any other protected characteristic. We encourage all qualified individuals to apply and welcome applications from diverse backgrounds and experiences. Candidates must be able to perform the essential functions of the job with or without reasonable accommodation. If you need an accommodation as part of the application process, please contact P_LOA@tsmc.com.

TSMC Arizona maintains the right to change or assign other duties to this position

All offers of employment are contingent upon the successful completion of TSMC Arizona's pre-employment screening process. This process may include verifying the candidate's identity, confirming legal authorization to work in the offered position's location, educational background and a comprehensive background check, where permitted by local regulations.
