Robotics Engineer Intern

Hadrian · Los Angeles, CA

Job ID (this archive)	MFG-023
Employer	Hadrian
Location	Los Angeles, CA
Career stage	Internship / co-op
Location group	Outside Texas
Major (archive tag)	Computer Science
Sector area	Automation & robotics
Industry (LinkedIn)	Defense and Space Manufacturing
Pay listed	$46.15 - $50.71
Stated rules	U.S. citizen / ITAR
Posted / closes	2026-10-15 · 2026-12-02
Status when checked	Accepting applications on LinkedIn (Nov 1, 2026)
Source page	https://www.linkedin.com/jobs/view/4460420975/
Captured	2026-11-01

Full posting text as it appeared on LinkedIn on Nov 1, 2026, saved for ECS 1100. Postings change and close often; open the source page above for the current version before applying.

At a glance

What you would do

Intern writing software, tools, dashboards, and data pipelines that run and monitor robotic automation in an aerospace factory.

Who can apply

- **Majors named:** Computer Science, Robotics, Electrical Engineering
- **Degree and experience:** Pursuing a BS or MS in CS, robotics, or EE; graduating Dec 2027-June 2028; strong C++ or Python.

Skills mentioned

Teamwork & collaboration · Communication · Automation & controls · Programming

Full posting text

Hadrian - Manufacturing the Future

Hadrian is building autonomous factories to reindustrialize America. By combining AI, advanced software, robotics, and full-stack manufacturing, we help aerospace and defense companies build rockets, satellites, aircraft, ships, and other mission-critical systems up to 10x faster and at significantly lower cost.

Following our $1.37B Series D at a $7.87B valuation, Hadrian is rapidly expanding our manufacturing footprint, launching new capabilities across welding, casting, forging, electronics, additive manufacturing, and more, while scaling our Factory-as-a-Service platform to transform how critical products are built.

Backed by leading investors including JPMorgan Chase, Valor Equity Partners, Andreessen Horowitz, Founders Fund, 137 Ventures, Lux Capital, T. Rowe Price, and Morgan Stanley, we’re building the future of American manufacturing—and

looking for exceptional people to help make it happen.

If you’re ready to take on the most challenging and rewarding work of your career while helping create American manufacturing jobs for generations to come, you’re exactly who we’re looking for.

The Role

Hadrian's Robotics team builds hardware and software that powers next-generation manufacturing. We're looking for a Robotics Software Engineer Intern to help design, develop, and deploy the software behind our intelligent automation systems. You'll work alongside experienced engineers on real production systems that operators, technicians, and factories depend on every day. We move quickly, ship continuously, and turn real factory needs into production-ready products.

What You'll Do

Build and improve internal tools, dashboards, and automation systems that support factory operationsContribute to backend services, APIs, and data pipelines used across engineering, operations, and quality teamsHelp design and implement features that improve visibility into production workflows, capacity, and program statusCollaborate with cross-functional teams including operations, program management, and quality to understand requirements and deliver software solutionsWrite clean, well-tested code and participate in code reviewsSurface technical risks and contribute to architectural discussions

What We're Looking For

Current university student pursuing a Bachelor's or Master's degree in Computer Science, Robotics, Electrical Engineering, or a related field, with an expected graduation date between December 2027 and June 2028Strong proficiency in C++ or PythonExposure to motion control, trajectory generation, and robot kinematics/dynamicsExperience working with cross-disciplinary teams and end-to-end project ownershipExcellent communication and documentation abilitiesPassionate about advancing manufacturing automation through robotics innovationExcitement for manufacturing, aerospace, defense, or industrial systemsComfortable working in a fast-moving, highly ambiguous environmentWillingness to work on-site in Los Angeles, CA

What Will Set You Apart

Prior internship or project experience shipping production softwareInterest in manufacturing systems, automation, or industrial software

What You'll Gain

Hands-on experience building software for a high-growth, mission-driven industrial companyDirect involvement in real production systems, not just internal tools or side projectsA front-row seat to how Hadrian is transforming aerospace and defense manufacturing through software, automation, and data

Compensation

For this role, the target hourly range is $46.15 - $50.71

This reflects the lowest to highest hourly rate we reasonably and in good faith believe we would pay for this intern position at the time of this posting. We may ultimately pay more or less than the posted range, and the range is subject to change. An intern's hourly rate within this range will be based on several factors, including, but not limited to relevant education, prior experience, skills, geographic location, and the nature of the internship assignment.

Intern Benefits

Housing support may be available based on business need.

Benefits for Full-time Employees

Medical, dental, vision, and life insurance plans for employees 401k Relocation support may be provided for certain situations, based on business need. Flexible vacation policy Equity

ITAR Requirements

To conform to U.S. Government export regulations, including the International Traffic in Arms Regulations (ITAR) you must be a U.S. citizen or national, lawful permanent resident, protected individual as defined by 8 U.S.C. 1324b(a)(3), or eligible to obtain the required authorizations from the U.S. Department of State. Learn more about the ITAR here.

Use of AI in hiring

Hadrian uses AI-assisted tools in our recruiting and hiring processes to help our team work more efficiently. This may include tools that help organize and analyze recruiting data, as well as an AI-powered notetaker that can record and transcribe interviews and help coordinate feedback. These tools support our team and are not used to make hiring decisions. All candidate evaluations and hiring decisions are performed by humans. If an interview will be recorded, you will be notified in advance and may opt out at any time with no impact on your candidacy. Candidate data processed through these tools is subject to the same protections described in our Privacy Policy.

Consideration of Criminal History

Hadrian will consider for employment qualified applicants with criminal histories in a manner consistent with the requirements of all applicable laws. We do not ask about criminal history on our application, and we do not consider criminal history before making a conditional offer of employment.

Hadrian Is An Equal Opportunity Employer

Hadrian does not unlawfully discriminate on the basis of race, color, religion, gender, national origin/ethnicity, veteran status, disability status, age, sexual orientation, marital status, mental status, physical disability or any other legally protected status. When necessary, the Company also makes reasonable accommodations for disabled candidates and employees, including for candidates or employees who are disabled by pregnancy, childbirth, or related medical conditions.
