Factory Software Engineer (Starlink)

SpaceX · Bastrop, TX

Job ID (this archive)	MFG-025
Employer	SpaceX
Location	Bastrop, TX
Career stage	New grad / early career
Location group	Texas (outside DFW)
Major (archive tag)	Computer Science
Sector area	Factory software & data
Industry (LinkedIn)	Aviation and Aerospace Component Manufacturing
Pay listed	Not listed
Stated rules	U.S. citizen / ITAR
Posted / closes	2026-10-16 · 2027-01-04
Status when checked	Accepting applications on LinkedIn (Nov 1, 2026)
Source page	https://www.linkedin.com/jobs/view/4425677338/
Captured	2026-11-01

At a glance

What you would do

Engineer writing and deploying software that runs factory test and production systems for Starlink devices, and debugging hardware/software issues.

Who can apply

- **Majors named:** Computer Science, Engineering, Math, Any STEM degree
- **Degree and experience:** Bachelor's in CS, engineering, math, or STEM, or 2+ years software experience; Python, Go, C++, or Rust experience.

Skills mentioned

Problem solving & root cause · Data analysis & statistics · Programming

Full posting text

SpaceX was founded under the belief that a future where humanity is out exploring the stars is fundamentally more exciting than one where we are not. Today SpaceX is actively developing the technologies to make this possible, with the ultimate goal of enabling human life on Mars.

FACTORY SOFTWARE ENGINEER (STARLINK)

Starlink is the world’s largest satellite constellation and is providing fast, reliable internet to millions of users worldwide. Users can get online within minutes almost anywhere on the world. We design, build, manufacture, and operate all parts of the system including thousands of satellites and millions of consumer kits. We’ve only begun to scratch the surface of Starlink’s potential. We are looking for best-in-class engineers to help maximize Starlink’s utility for individuals, communities, and businesses.

As a Factory Software Engineer, you will be solving challenges such as:

Writing software that runs both on our servers and products during the manufacturing processCreating infrastructure and tools for rapid and reliable deployment of new software to the factory with minimal downtimeDebugging software and hardware issues to improve factory output

Our software engineers are responsible for the complete lifecycle of the software they create, including development, testing, and support.

Responsibilities

Work with the Starlink factory engineering teams to manufacture devices in-houseInvent new tools that enable more frequent and reliable software deployment, test execution, and data analysis as part of a continuous integration and release systemDesign and implement highly available, fault-tolerant systems that operate for long periods of time with minimal interventionDevelop systems that allow for test execution across multiple environments such as virtualized hardware or real hardware-in-the-loop simulationsBringup and maintain servers and networking for use in the factoryParticipate in architecture, design, and code reviews

Basic Qualifications

Bachelor’s degree in computer science, engineering, math, or a STEM discipline; OR 2+ years of professional experience in software engineering in lieu of a degree (internship experience is applicable)Development experience in Python, Golang, C++, or Rust

Preferred Skills And Experience

Solid fundamental knowledge of networking protocols (TCP/IP etc.), electronics, radio frequencyCreative approach to problem solving, exceptional analytical skills and engineering fundamentalsStrong skills in debugging, performance optimization, and testingExperience with security issues associated with distributed systems and internet services

Additional Requirements

Must be willing to work extended hours and weekends as needed

Itar Requirements

To conform to U.S. Government export regulations, applicant must be a (i) U.S. citizen or national, (ii) U.S. lawful, permanent resident (aka green card holder), (iii) Refugee under 8 U.S.C.1157, or (iv) Asylee under 8 U.S.C.1158, or be eligible to obtain the required authorizations from the U.S. Department of State. Learn more about the ITAR here.

SpaceX is an Equal Opportunity Employer; employment with SpaceX is governed on the basis of merit, competence and qualifications and will not be influenced in any manner by race, color, religion, gender, national origin/ethnicity, veteran status, disability status, age, sexual orientation, gender identity, marital status, mental or physical disability or any other legally protected status.

Applicants wishing to view a copy of SpaceX’s Affirmative Action Plan for veterans and individuals with disabilities, or applicants requiring reasonable accommodation to the application/interview process should reach out to EEOCompliance@spacex.com.
