Company Description

About AbbVie

AbbVie's mission is to discover and deliver innovative medicines and solutions that solve serious health issues today and address the medical challenges of tomorrow. We strive to have a remarkable impact on people's lives across several key therapeutic areas including immunology, oncology and neuroscience - and products and services in our Allergan Aesthetics portfolio. For more information about AbbVie, please visit us at www.abbvie.com. Follow @abbvie on LinkedIn, Facebook, Instagram, X and YouTube.

Job Description

Connected Factory is a program focused on the technical stewardship of key integration capabilities and their associated platforms across Manufacturing Operations at AbbVie. The Connected Factory Engineering team will be responsible for helping progress the technical roadmap of platforms, accelerating the maturity of integrations between critical components of AbbVie's manufacturing shopfloor, and advancing the availability of data for advanced use cases. This will include work with Ignition, OSI PI, Kepware, HighByte, AWS Cloud Services, and many other platforms. Data and Integration capabilities that our team will support include API's and their management, IT/OT convergence, MQTT and other real-time data streaming protocols, Unified Namespace management, data historization, and event-driven services.

Responsibilities

Analyze existing solutions and processes and identify areas for optimization. Gather requirements from business users and translate them into technical specifications. Design and engineer technical capabilities to meet business needs. Develop system documentation, including user/admin manuals, architecture drawings, and technical specifications. Build and execute test protocols to ensure solutions are functioning to specification. Author deployment instructions and implement them across various platforms supported by the team. Intake, troubleshoot, and resolve technical issues as they are reported or as alerts are received. Ensure that systems operate effectively, securely, and comply with relevant regulations. Collaborate with cross-functional teams to ensure that solutions are integrated and scalable. Stay up to date with emerging trends and technologies in the field.

Qualifications

Required

Bachelor’s degree in Computer Science, Information Systems, or related field plus 2 years of experience as a Developer, Systems Analyst/Admin, Engineer/Integrator, or similar role; or Master's degree with 0 experience. Experience working with Ignition, Kepware, OSI PI, HighByte, and/or AWS Cloud Services.Excellent analytical, communication and consultative skills and the ability to work efficiently with clients and other IT management and staff. High focus on deliverables and detail oriented. Must exhibit exceptional teamwork skills. Demonstrate high proficiency across a wide range of technologies and platforms related to software design and development, programming languages, data integration, data warehousing, data analysis and visualization tools, data storage, network connectivity, and virtualization/cloud environments.

Preferred

Experience with Artificial Intelligence, Large Language Models, and their capabilitiesExperience in pharma, healthcare or regulated industry

Additional Information

Applicable only to applicants applying to a position in any location with pay disclosure requirements under state or local law:

The compensation range described below is the range of possible base pay compensation that the Company believes in good faith it will pay for this role at the time of this posting based on the job grade for this position. Individual compensation paid within this range will depend on many factors including geographic location, and we may ultimately pay more or less than the posted range. This range may be modified in the future. We offer a comprehensive package of benefits including paid time off (vacation, holidays, sick), medical/dental/vision insurance and 401(k) to eligible employees. This job is eligible to participate in our short-term incentive programs.

Note: No amount of pay is considered to be wages or compensation until such amount is earned, vested, and determinable. The amount and availability of any bonus, commission, incentive, benefits, or any other form of compensation and benefits that are allocable to a particular employee remains in the Company's sole and absolute discretion unless and until paid and may be modified at the Company’s sole and absolute discretion, consistent with applicable law.

AbbVie is an equal opportunity employer and is committed to operating with integrity, driving innovation, transforming lives and serving our community. Equal Opportunity Employer/Veterans/Disabled.
