Security Engineer (OT)

SpaceX · Texas, United States

Job ID (this archive)	MFG-037
Employer	SpaceX
Location	Texas, United States
Career stage	New grad / early career
Location group	Texas (outside DFW)
Major (archive tag)	Cybersecurity Technology & Policy
Sector area	OT & industrial cybersecurity
Industry (LinkedIn)	Aviation and Aerospace Component Manufacturing
Pay listed	Not listed
Stated rules	U.S. citizen / ITAR
Posted / closes	2026-10-16 · 2026-11-15
Status when checked	Accepting applications on LinkedIn (Nov 1, 2026)

At a glance

What you would do

Engineer designing, coding, and operating network security for factory and launch operational-technology networks, including segmentation and threat monitoring.

Who can apply

- **Majors named:** Computer Science, Any STEM degree
- **Degree and experience:** Bachelor's in CS or another STEM field, or 2+ years security software experience; Python, Go, C#, C/C++, or Rust.

Skills mentioned

Automation & controls · Programming · Cybersecurity & OT security

Full posting text

SpaceX was founded under the belief that a future where humanity is out exploring the stars is fundamentally more exciting than one where we are not. Today SpaceX is actively developing the technologies to make this possible, with the ultimate goal of enabling human life on Mars.

SECURITY ENGINEER (OT)

SpaceX is looking for a Security Engineer (OT) to join Information Security to help protect and drive the SpaceX mission.

Information drives our business. We must protect the confidentiality, integrity, and availability of systems and processes across the enterprise, and defend against loss of control or confidence in our systems.

This role secures Operational Technology (OT) networks that support launch, vehicle, test, and production, including rockets. You will write software, automate on-prem and data center networking, and produce architectures. This is

hands-on security software and network engineering.

Responsibilities

- Design, implement, and operate security for OT networks supporting launch, vehicle, test, and production.
- Design network and security architectures and produce diagrams and design documentation.
- Write and deploy software that runs in OT and on-prem network environments.
- Automate on-prem and data center networking.
- Implement network segmentation and access control in OT environments.
- Monitor, detect, and respond to security issues on OT networks.
- Partner with engineering, IT, and site teams.
- Document architectures, standards, and operating procedures.

Basic Qualifications

- Bachelor's degree in computer science or another STEM discipline; OR 2+ years of professional experience in security software development in lieu of a degree.
- Experience with Python, Go, C#, C/C++, or Rust.
- Experience designing and implementing security solutions for operating systems, distributed systems, or other enterprise / large-scale infrastructure.

Preferred Skills And Experience

- Shipping and operating services in Python, Go, C++, or Rust.
- On-prem and data center networking.
- BGP and network automation.
- Terraform and Ansible.
- Network and security architecture, including diagrams and design documentation.
- ICS, SCADA, DCS, or other industrial control and OT environments.
- Network segmentation in production OT or industrial networks.

Additional Requirements

- Must be willing to work extended hours and/or weekends as needed.
- This role requires you to be onsite. Hybrid or remote work will not be considered.
- Ability to pass Air Force background check for Cape Canaveral.

Itar Requirements

To conform to U.S. Government export regulations, applicant must be a (i) U.S. citizen or national, (ii) U.S. lawful, permanent resident (aka green card holder), (iii) Refugee under 8 U.S.C.1157, or (iv) Asylee under 8 U.S.C.1158, or be eligible to obtain the required authorizations from the U.S. Department of State. Learn more about the ITAR here.

SpaceX is an Equal Opportunity Employer; employment with SpaceX is governed on the basis of merit, competence and qualifications and will not be influenced in any manner by race, color, religion, gender, national origin/ethnicity, veteran status, disability status, age, sexual orientation, gender identity, marital status, mental or physical disability or any other legally protected status.

Applicants wishing to view a copy of SpaceX's Affirmative Action Plan for veterans and individuals with disabilities, or applicants requiring reasonable accommodation to the application/interview process should reach out to EEOCompliance@spacex.com.
