Advanced Analytics Research Scientist - Industrial Edge Intelligence

Rockwell Automation · Austin, TX

Job ID (this archive)	MFG-048
Employer	Rockwell Automation
Location	Austin, TX
Career stage	Experienced
Location group	Texas (outside DFW)
Major (archive tag)	Data Science
Sector area	Factory software & data
Industry (LinkedIn)	Automation Machinery Manufacturing
Pay listed	Not listed
Stated rules	No GPA or sponsorship rule stated
Posted / closes	2026-10-20 · 2026-11-27
Status when checked	Accepting applications on LinkedIn (Nov 1, 2026)
Source page	https://www.linkedin.com/jobs/view/4472764455/
Captured	2026-11-01

Full posting text as it appeared on LinkedIn on Nov 1, 2026, saved for ECS 1100. Postings change and close often; open the source page above for the current version before applying.

At a glance

What you would do

Researcher designing and deploying AI systems that run on edge computers inside factories to optimize and autonomously control industrial processes.

Who can apply

- **Majors named:** No specific major named
- **Degree and experience:** Bachelor's degree in a relevant field; 5+ years relevant experience typically preferred.

Skills mentioned

Teamwork & collaboration · Problem solving & root cause · Automation & controls · Data analysis & statistics · Programming · Cybersecurity & OT security

Full posting text

Rockwell Automation is a global technology leader focused on helping the world’s manufacturers be more productive, sustainable, and agile. With more than 28,000 employees who make the world better every day, we know we have something special. Behind our customers - amazing companies that help feed the world, provide life-saving medicine on a global scale, and focus on clean water and green mobility - our people are energized problem solvers that take pride in how the work we do changes the world for the better.

We welcome all makers, forward thinkers, and problem solvers who are looking for a place to do their best work. And if that’s you we would love to have you join us!

Job Description

Job Description

We are looking for a inventive AI engineer/scientist to help build the next generation of AI-native industrial automation systems powered by latest edge compute platforms.

You will focus on developing intelligent systems capable of real-time learning, reasoning, optimization, and autonomous operation. These systems operate directly within industrial environments, bringing advanced AI capabilities closer to machines, processes, and operational decision making. You will work at the convergence of edge AI, industrial automation, autonomous systems, embedded intelligence, and real-time operational analytics to help define how you design and operate future industrial systems.

This role focuses on redefining industrial automation through AI-native system design. The company embeds intelligence directly at the edge, making it capable of learning, adapting, and operating autonomously in real-world environments. You will work on frontier challenges involving real-time AI, autonomous operation, optimization, and industrial-scale deployment while helping shape the future of intelligent industrial infrastructure.

You will report to the Director AI and have a hybrid work schedule, working from Austin, TX

Responsibilities

Develop AI-native industrial systems capable of:Real-time reasoning and decision makingAdaptive process optimizationAutonomous operational behaviorsContinuous learning from operational dataIntelligent coordination across distributed industrial assets Design and deploy AI solutions on latest edge compute platforms with advanced CPU/GPU acceleration capabilities Build architectures that combine:Generative AI and small language modelsMachine learning and reinforcement learningOptimization and control systemsStreaming analytics and event-driven intelligenceDistributed and edge-native AI inference Ensure low-latency AI execution directly within industrial environments while balancing performance, reliability, and operational constraintsIntegrate AI capabilities with industrial automation systems, robotics platforms, sensors, controllers, and operational infrastructureCollaborate with diverse teams spanning AI research, controls engineering, embedded systems, and industrial operations

The Essentials - You Will Have

Bachelor's Degree in Relevant Field

The Preferred - You Might Also Have

Typically requires 5+ years relevant experienceBackground in the following:Edge AI systemsMachine learning systems engineeringAutonomous systemsIndustrial AIEmbedded or distributed AI architecturesExperience developing and deploying AI applications in resource-constrained or real-time environmentsSoftware engineering skills in Python and modern AI/ML frameworksFamiliarity with:Edge inference optimizationGPU-accelerated computingStreaming and real-time systemsDistributed AI architecturesControl and optimization systemsBridge advanced AI concepts with practical deployment in operational environmentsCuriosity, creativity, and a passion for building intelligent systems that interact directly with the physical world

Bonus Experience

Industrial automation or control systemsRobotics and autonomous platformsReinforcement learning or adaptive controlTime-series analytics and anomaly detectionEmbedded systems and edge deployment toolchainsDigital twins and simulation environmentsVision-language or multimodal AI systemsCyber-physical systems and operational technology (OT)

What We Offer

Health Insurance including Medical, Dental and Vision401kPaid Time offParental and Caregiver LeaveFlexible Work Schedule where you will work with your manager to enjoy a work schedule that can be flexible with your personal life.To learn more about our benefits package, please visit at www.raquickfind.com.

This position is part of a job family. Experience will be the determining factor for position level and compensation

At Rockwell Automation we are dedicated to building a diverse, inclusive and authentic workplace, so if you're excited about this role but your experience doesn't align perfectly with every qualification in the job description, we encourage you to apply anyway. You may be just the right person for this or other roles.

We are an Equal Opportunity Employer including disability and veterans.

If you are an individual with a disability and you need assistance or a reasonable accommodation during the application process, please contact our services team at +1 (844) 404-7247.

Rockwell Automation’s hybrid policy aligns that employees are expected to work at a Rockwell location at least Mondays, Tuesdays, and Thursdays unless they have a business obligation out of the office.
