Anneal Engineer - Equipment or Process

Samsung Semiconductor · Taylor, TX

Job ID (this archive)	MFG-056
Employer	Samsung Semiconductor
Location	Taylor, TX
Career stage	New grad / early career
Location group	Texas (outside DFW)
Major (archive tag)	Electrical Engineering
Sector area	Electronics & semiconductor manufacturing
Industry (LinkedIn)	Semiconductor Manufacturing
Pay listed	$95,000 - $120,000.00
Stated rules	U.S. citizen / ITAR
Posted / closes	2026-10-24 · 2026-12-10
Status when checked	Accepting applications on LinkedIn (Nov 1, 2026)

At a glance

What you would do

Engineer keeping semiconductor anneal tools running, troubleshooting equipment alarms, analyzing yield and defect data, and leading tool qualifications and cost-reduction projects.

Who can apply

- **Majors named:** Electrical Engineering, Chemical Engineering, Physics, Mechanical Engineering
- **Degree and experience:** BS in Electrical, Chemical, Physics or Mechanical Engineering or related; 2+ years semiconductor experience highly desired

Skills mentioned

Communication · Problem solving & root cause · Safety · Data analysis & statistics

About Samsung Austin Semiconductor

Samsung is a world leader in advanced semiconductor technology, founded on the belief that the pursuit of excellence creates a better world. At Samsung Austin Semiconductor, we are Innovating Today to Power the Devices of Tomorrow.

Come innovate with us!

Position Summary

In your role as an Anneal Engineer, you'll be responsible to support equipment and process capabilities of 300mm tools for the Implant department.

You will be a part of a team that focuses on keeping tools running at peak efficiency and drive yield improvements, reduce defects, cut operating costs, and implement continuous■improvement initiatives across a 24×7 manufacturing environment

Role And Responsibilities

Here's what you'll be responsible for

- Equipment Monitoring and Troubleshooting. Observe real■time tool performance; identify and resolve issues (mechanical, electrical, pneumatic, defects).
- Respond to alarms and perform recovery plans with technicians.
- Use software to analyze data, identify root causes, and make decisions about processing product.
- Lead new tool qualification.
- Schedule and coordinate equipment maintenance and coordinate downtime with manufacturing team.
- Execute Change■Point Management (CPM).
- Standardization & Documentation. Revise and maintain SOPs, record daily tool activity, and capture lessons learned.
- Communicate technical updates via presentations to cross■functional teams.
- Monitor operational costs and lead projects for cost■reduction.
- Document and track performance metrics (yield, throughput, particle counts).

Skills And Qualifications

Here's what you'll need

- BS degree in Electrical, Chemical, Physics, or Mechanical Engineering or related field of study2+ years of semiconductor experience highly desired with knowledge of Thermal Anneal (RTP) processes and equipment.
- Experience with any of the following tools preferred.
- AMAT Centura RadianceAMAT Centura DPN or DPXAMAT Vantage RadianceAMAT Vantage AstraMattson MilliosVeeco LSAExperience with troubleshooting Equipment or Process failures.
- Experience with tool installation and setup.
- Understanding of statistical methodsStructured Problem-Solving (8D, 7-step, etc..) ability.
- Able to wear clean room suit and Personal Protective Equipment (PPE) and to lift < 35 lbs. Able to work in FAB environment and sitting at a computer terminal for extended periods of time

Note: You may be exposed to yellow lights, blinking lights

The current base salary range for this role is between $95,000 - $120,000.00. Individual base pay rates will depend on factors including duties, work location, education, skills, qualifications and experience. Total compensation for this position will include a competitive benefits package and may include participation in company incentive compensation programs, which are based on factors to include organizational and individual performance.

Total Rewards

At Samsung Austin Semiconductor, base pay is just one part of our total compensation package. The base compensation for this role will depend on education, experience, skills, and location.

We offer a comprehensive benefits package, including:

Medical, dental, and vision insuranceLife insurance and 401(k) matching with immediate vestingOnsite café(s) and workout facilitiesPaid maternity and paternity leavePaid time off (PTO) + 2 personal holidays and 10 regular holidaysWellness incentives and MORE

Eligible full-time employees (salaried or hourly) may also receive MBO bonuses based on company, division, and individual performance.

All positions at Samsung Austin Semiconductor are full-time on-site.

U.S. Export Control Compliance

This role may require access to information subject to U.S. export control laws. Applicants must be authorized to access such information or eligible for government authorization.
