Relocation: Yes

Innovation is the heart of Brunswick. See how your contributions will help transform vision into reality:

Position Overview

As part of the talented Quality team, you will support the launch of state-of-the-art systems through metallurgical analysis. You will learn how to work with a team of managers, supervisors, technicians, and production employees in a metallurgical lab as well as on the plant floor as you create and manage projects from inception to completion. Position reports to Mercury Marine Heat Treat Metallurgical Engineer.

At Brunswick, we have passion for our work and a distinct ability to deliver.

Essential Functions

Operate X-ray diffractometer, Automated Micro-hardness tester, and other instrumentation which aid in metallurgical analysisPerform testing on a variety of carbon steels, stainless steels, and aluminum alloysDeliver critical material analysis and inspection resultsSupport Heat Treat Metallurgical Laboratory daily operations

In addition to a great hands-on learning experience you will also acquire the skills needed to:

Effectively and quickly collect and analyze data coming from manufacturing processesMake recommendations that effectively improve processesEffectively express your ideas, influence decisions, manage projects to a positive result, and communicate with employees at all levels of an organization

Diversity of thought and experiences is fundamental when imagining the unimaginable. Certain skillsets/experiences are necessary; however, others can be developed along the way.

Required Qualifications

Current enrollment in a BS program with a major in Metallurgical Engineering, Materials Science, Mechanical Engineering, or a relevant degree with materials or metallurgy emphasisMinimum second semester sophomore status with 48 completed creditsAvailability to work full-time (40 or more hours per week) through a full co-op term running January to August 2027 or May to December 2027The ability to enroll in a formalized co-op Program through your universityDependable, self-motivated and engaged learnerAbility to occasionally lift up to 35 lbs.

Working Conditions

Learning Opportunities: Our Student Program is designed to provide hands-on experience in a professional setting. You will work alongside experienced professionals and get a chance to apply your academic knowledge to real-world tasks. Project Work: The work environment is supportive, collaborative, and conducive to learning. Student co-ops or interns typically work on specific projects or tasks that contribute to the organization’s goals. This may range from supporting larger projects to handling smaller, individual assignments. Hours: Co-ops and Interns are expected to work a full 40-hour work week Feedback and Performance Reviews: As a co-op or intern, you will receive feedback and performance reviews throughout your assignment. We value the importance for interns to understand their progress and areas for improvement.

The pay range for this position is $18.00-27.50 per hour. The actual hourly rate offered will vary depending on multiple factors including year in school/credits earned, degree, job-related knowledge/skills, relevant experience, business needs, and geographic location. Compensation decisions are dependent upon the specifics of the candidate’s qualifications and the business context.

Why Brunswick

Whatever tomorrow brings, we’ll be at the leading edge. As the clear leader in the marine industry, we’re committed to our values and supporting our exceptional people.
