CMP/Wet/YE Ramp Process Engineer (SM1)

Texas Instruments · Sherman, TX

Job ID (this archive)	MFG-067
Employer	Texas Instruments
Location	Sherman, TX
Career stage	New grad / early career
Location group	Texas (outside DFW)
Major (archive tag)	Materials Science & Engineering
Sector area	Electronics & semiconductor manufacturing
Industry (LinkedIn)	Semiconductor Manufacturing
Pay listed	$81,500 - $126,000
Stated rules	U.S. citizen / ITAR
Posted / closes	2026-10-30 · 2026-12-15
Status when checked	Accepting applications on LinkedIn (Nov 1, 2026)
Source page	https://www.linkedin.com/jobs/view/4457672392/

At a glance

What you would do

Process engineer qualifying new chip-polishing and wafer-cleaning tools, analyzing yield data, dispositioning lots and improving processes in a 300mm wafer fab.

Who can apply

- **Majors named:** Chemical Engineering, Chemistry, Electrical Engineering, Materials Science, Mechanical Engineering, Physics
- **Degree and experience:** Bachelor's in ChE, Chemistry, EE, Materials Science, ME, Physics or related; 2+ years semiconductor process/manufacturing experience

Skills mentioned

Teamwork & collaboration · Communication · Problem solving & root cause · Data analysis & statistics · Programming

Job Description

Change the world. Love your job.

Texas Instruments is looking for an energetic engineer with a passion for process. This position provides the opportunity to drive continual improvement at all levels. Our team is primarily focused on driving improved procedures and processes. We are searching for a self-directed, highly motivated engineer to join our team.

The responsibilities of a Manufacturing Process Engineer in this role include:

- Be curious. Seek feedback. Honor commitments. Drive results. Support manufacturing operations in a high-interrupt and rapidly ramping tool install environment. Rapidly qualify new tool installations as well as max out capabilities of

existing toolsets to support maximum possible quality wafer movement through the CMP/Wet/YE Process tools. Develop and implement improved CMP/Wet and YE Process methods of manufacturing, procedures, and processes that result in improved efficiencies, yields, machine operations, and quality, and a relentless commitment to chase and visualize the data. Implement project or improvement plans for areas of responsibility including but not limited to: efficiency improvements, cost reduction or quality improvement programs, new product support and other process improvements.

- Perform lot and equipment dispositions to support the continuous flow of production and to minimize cycle time in a high volume manufacturing 300mm wafer Fab running Analog Technologies.
- Provide training to junior colleagues and process technicians. Maintain and improve training documentation and procedures. Identify systematic problems in either process or equipment related sources and communicating findings to the engineering staff in a continuous manner.
- Support the manufacturing ramp with execution of equipment/process startup, process experiments (SWRs).
- Participate in data analysis and problem resolution. Collaborate across teams/ branches to solve fab priorities, which can change quickly.

Qualifications

Minimum requirements

Bachelor's degree in Chemical Engineering, Chemistry, Electrical Engineering, Materials Science Engineering, Mechanical Engineering, Physics, or a related field2 + years relevant Semiconductor Process /manufacturing experiences

Preferred Qualifications

Strong foundation in statistical process control, engineering change control and process release strategiesProficiency with Python, Claude, or other AI modles or tools is a plusExperience with AMAT and EBARA CMP process toolsExperience with bath or single wafer clean wet process toolsetsExperience in defect metrologyExperience working with big data and enterprise systems is a plusStrong understanding of Cu and Al BEOL integrations Demonstrated strong analytical and problem solving skillsStrong verbal and written communication skillsAbility to work in teams and collaborate effectively with people in different functionsStrong time management skills that enable on-time project deliveryDemonstrated ability to build strong, influential relationshipsAbility to work effectively in a fast-paced and rapidly changing environmentAbility to take the initiative and drive for result

Base pay is one part of our total compensation package and is determined within a range. This provides the opportunity to progress as you grow and develop within a role. Your base pay will depend on your skills, qualifications, experience, and location. The base pay range for this role is shown below.

Pay Range: $81,500 - $126,000

About Us

Why TI?

The future starts here. As a TIer, you'll play a critical role in defining the next era of semiconductor technology and help create the innovations that shape the world around us.Surround yourself with a team of innovators who value your unique perspective and will challenge you to bring your best self to work every day. We believe that fostering a culture of collaboration fuels both personal growth and technological breakthroughs. Explore our company culture .At TI, your success goes beyond your work. Take advantage of comprehensive benefits designed to support your total well-being at work and in life, from competitive compensation to extensive health coverage and wellness programs. Learn more about our benefits offerings .

About Texas Instruments

Texas Instruments Incorporated (Nasdaq: TXN) is a global semiconductor company that designs, manufactures and sells analog and embedded processing chips for markets such as industrial, automotive, data center, personal electronics and communications equipment. At our core, we have a passion to create a better world by making electronics more affordable through semiconductors. This passion is alive today as each generation of innovation builds upon the last to make our technology more reliable, more affordable and lower power, making it possible for semiconductors to go into electronics everywhere. Learn more at TI.com .

Texas Instruments is an equal opportunity employer and supports a diverse, inclusive work environment. All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, disability, genetic information, national origin, gender, gender identity and expression, age, sexual orientation, marital status, veteran status, or any other characteristic protected by federal, state, or local laws.

If you are interested in this position, please apply to this requisition.

About The Team

TI does not make recruiting or hiring decisions based on citizenship, immigration status or national origin. However, if TI determines that information access or export control restrictions based upon applicable laws and regulations would prohibit you from working in this position without first obtaining an export license, TI expressly reserves the right not to seek such a license for you and either offer you a different position that does not require an export license or decline to move forward with your employment.
