Manufacturing Integration Engineer (Starship)

SpaceX · Texas, United States

Job ID (this archive)	MFG-075
Employer	SpaceX
Location	Texas, United States
Career stage	New grad / early career
Location group	Texas (outside DFW)
Major (archive tag)	Mechanical Engineering
Sector area	Discrete & advanced manufacturing
Industry (LinkedIn)	Aviation and Aerospace Component Manufacturing
Pay listed	Not listed
Stated rules	U.S. citizen / ITAR
Posted / closes	2026-10-16 · 2027-01-05
Status when checked	Accepting applications on LinkedIn (Nov 1, 2026)
Source page	https://www.linkedin.com/jobs/view/4426511562/
Captured	2026-11-01

Full posting text as it appeared on LinkedIn on Nov 1, 2026, saved for ECS 1100. Postings change and close often; open the source page above for the current version before applying.

At a glance

What you would do

Build engineer developing and qualifying manufacturing processes, precision tooling and automated inspection for rocket propulsion, avionics and welded structures.

Who can apply

- **Majors named:** Aerospace Engineering, Manufacturing Engineering, Materials Engineering, Mechanical Engineering, Any engineering degree
- **Degree and experience:** Bachelor's or advanced degree in aerospace, manufacturing, materials, mechanical or other engineering; 1+ years manufacturing/process design (internships count)

Skills mentioned

Teamwork & collaboration · Problem solving & root cause · Automation & controls

Full posting text

SpaceX was founded under the belief that a future where humanity is out exploring the stars is fundamentally more exciting than one where we are not. Today SpaceX is actively developing the technologies to make this possible, with the ultimate goal of enabling human life on Mars.

BUILD ENGINEER (STARSHIP)

As a build engineer on the Starship team, you will be responsible for developing and qualifying processes for high-rate, mixed-product manufacturing of propulsion, avionics, and welded structural assemblies. Focus will be on design for manufacturing, implementing poka-yoke systems, increasing product yield, and automation as required to minimize takt and cycle times.

Responsibilities

Develop and perform acceptance testing of manufacturing processes, techniques, and tools to enable efficient and high-rate manufacturingDesign and implement precision tooling to eliminate assembly error, improve quality, and minimize cycle timeAutomate novel processes to ensure repeatability on high-rate manufacturing linesWork closely with design engineering teams to influence flight design and vehicle architecture with design for manufacturing improvementsDevelop and/or automate in-situ inspection techniques to increase yield and decrease cycle timeManage transition of parts and assemblies from development to high-rate productionChallenge and simplify requirements to optimize processes and reduce overhead

Basic Qualifications

Bachelor's or advanced degree in aerospace engineering, manufacturing engineering, materials engineering, mechanical engineering, or other engineering discipline1+ years of manufacturing and process design experience (internship and academic experience is applicable)

Preferred Qualifications

Master's degree in an engineering disciplineHands-on project experience with mixed value stream or high-rate manufacturing lines, focusing on maximizing yield and increasing rateProficiency in mechanical assembly methods, testing, failure mode effects analysis, and troubleshootingExperience with integration and testing of propulsion, thermal, electrical, and/or structural systemsPrior experience with developing, maintaining, and improving weld processes and weld inspection techniques, inclusive of automationExperience using SQL or other data management structures to inform priorities and measure performance

Additional Requirements

Flight hardware typically is built in tight quarters and physical dexterity is requiredAbility to perform job duties that require standing, kneeling, crouching, twisting upper body, working in cramped positions in small openings and climbing hand over handTypically exposed to work in extreme outdoor environments – heat, cold, rainWork performed in an environment requiring exposure to fumes, odors, and noiseSchedule varies depending on site operational needs; flexibility requiredFlexibility to travel to remote build sites, up to 10%Stand: Up to 6 hours per daySit: Up to 6 hours per dayPush/Pull: Up to 50lbs. (unassisted) 30 minutes to 1 hour per dayOverhead reach: Up to 1 hour per dayWalk: Up to 1 hour per dayLift/Carry: Up to 25lbs. (unassisted) 30 minutes to 1 hour per dayClimb (ladder/stairs): Up to 6 hours per dayKneel/Crouch: Up to 6 hours per dayUpper body twist: Up to 6 hours per dayAbility to work in temperatures over 80 degrees 6 hours or greater per dayCandidate must be capable of safely working at heights (up to 500ft), in confined spaces, using an air purifying respirator, operating heavy equipment and machinery, and performing the physical requirements of the job listed in the job descriptionCandidate may be required to complete a pre-employment questionnaire and/or physical to confirm these capabilities, which may include a medical history review

Itar Requirements

To conform to U.S. Government export regulations, applicant must be a (i) U.S. citizen or national, (ii) U.S. lawful, permanent resident (aka green card holder), (iii) Refugee under 8 U.S.C.1157, or (iv) Asylee under 8 U.S.C.1158, or be eligible to obtain the required authorizations from the U.S. Department of State. Learn more about the ITAR here.

SpaceX is an Equal Opportunity Employer; employment with SpaceX is governed on the basis of merit, competence and qualifications and will not be influenced in any manner by race, color, religion, gender, national origin/ethnicity, veteran status, disability status, age, sexual orientation, gender identity, marital status, mental or physical disability or any other legally protected status.

Applicants wishing to view a copy of SpaceX’s Affirmative Action Plan for veterans and individuals with disabilities, or applicants requiring reasonable accommodation to the application/interview process should reach out to EEOCompliance@spacex.com.
