At a glance

What you would do

Intern building manufacturing execution apps, Power BI dashboards, API and machine data connections, and documentation for digital tools on generator production lines.

Who can apply

- **Majors named:** Computer Science, Data Science, Manufacturing Engineering, Industrial Engineering, Related field
- **Degree and experience:** Pursuing a BS in computer science, data science, manufacturing or industrial engineering, or related field; scripting and visualization experience; junior year completion preferred.

Skills mentioned

Communication · Supply chain, planning & logistics · Data analysis & statistics · Excel · Programming · ERP / SAP / MES

Full posting text

We are Generac, a leading energy technology company committed to powering a smarter world.

Over the 60 plus years of Generac’s history, we’ve been dedicated to energy innovation. From creating the home standby generator market category, to our current evolution into an energy technology solutions company, we continue to push new boundaries.

Generac’s Internship Program is designed to provide students with real-world experience in a supportive and innovative environment. Students contribute to impactful projects, gain exposure to industry best practices, and build lasting professional connections. This is a valuable opportunity to develop your skills and grow alongside experienced mentors.

About The Internship Program

Generac's Internship Program is full-time (40 hours per week) from May/June to August, 2027. The program will be on-site at Generac's Waukesha, WI (headquarters.)

Generac's Intern position is responsible to work with other engineers to fulfill special requests related to the digital solutions used in our manufacturing process. Under supervision of engineers, the intern will have the opportunity to create manufacturing applications, Power BI reports, OPC-UA based machine connections, API connections, and dashboards. Participants develop technical skills through challenging assignments and usage of technical tools.

Roles And Responsibilities

- Area of focus is MES app building and documentation, data analytics, and other duties as assigned.
- Support the design, validation, and documentation of new digital solutions into the manufacturing process.
- Provides new solution development support in the Industrial and Residential production sites including creating scopes of work, technical documentation and training materials.
- Supporting change requests to current digital solutions (scope of work, project plan, cost); Interfacing with internal company personnel; provide technical support for assigned projects.
- Interface with IT data team for data lake refinementCreate and modify Power Bi dashboardsIntegrate systems utilizing APIsTravels to other Generac facilities as necessaryOther duties as assigned.

Minimum Qualifications

- Currently pursuing a BS degree in computer science, data science, manufacturing engineering, industrial engineering, or related field.
- Understanding or working knowledge of discrete manufacturing workflowsExposure to MES, ERP, supply chain systems, or industrial data platformsExperience with visualization tools such as Power BI, Tableau, or Python visualization librariesExperience preparing analytical summaries and presentations for technical and non-technical stakeholdersDemonstrated understanding of data pipeline concepts including ingestion, transformation, storage, and analysisProficiency in data analysis and scripting languages such as Python, R, Julia, or similar languagesMicrosoft Office experience (including Excel).
- Proficient oral and written communication and able to write clearly and succinctly to get a message across.
- Ability to work FULL-TIME during the Summer – 40 Hour Week; Potential For Work Over Breaks

Preferred Qualifications

Completion of Junior Year

Physical Demands: While performing the duties of this job, the employee is regularly required to talk and hear; and use hands to manipulate objects or controls. The employee is regularly required to stand and walk. On occasion, the incumbent may be required to stoop, bend, or reach above the shoulders. The employee must occasionally lift up to 25 pounds. Specific conditions of this job are typical of frequent and continuous computer-based work requiring periods of sitting, close vision, and the ability to adjust focus. Occasional travel.
