Industrial Systems Engineer - RTD

Texas Instruments · Richardson, TX

Job ID (this archive)	MFG-095
Employer	Texas Instruments
Location	Richardson, TX
Career stage	New grad / early career
Location group	DFW area
Major (archive tag)	Systems Engineering
Sector area	Electronics & semiconductor manufacturing
Industry (LinkedIn)	Semiconductor Manufacturing
Pay listed	Not listed
Stated rules	U.S. citizen / ITAR
Posted / closes	2026-10-29 · 2026-12-15
Status when checked	Accepting applications on LinkedIn (Nov 1, 2026)

At a glance

What you would do

Industrial systems engineer writing automated logic that schedules and dispatches wafer lots and material movement in a 300mm chip fab.

Who can apply

- **Majors named:** Industrial Engineering, Systems Engineering, Electrical Engineering, Computer Engineering, Computer Science
- **Degree and experience:** Bachelor's in Industrial, Systems, Electrical or Computer Engineering, CS or related; 2 years semiconductor or high-volume manufacturing experience

Skills mentioned

Teamwork & collaboration · Communication · Problem solving & root cause · Automation & controls · Data analysis & statistics · Excel · Programming

Job Description

Change the world. Love your job.

About The Job

North Texas 300mm Industrial Engineering (IE) group is seeking an accomplished Industrial Systems Engineer to join our team. The hired candidate will be part of the APF Engineering group that plays a crucial part in developing system logic that drives productivity and efficiency at TI’s 300mm facilities in North Texas. This particular position will be based out of the 300mm Richardson site.

The desired candidate will have previous experience transitioning to new roles quickly, effectively learning new concepts, and being self-motivated to meet objectives in a rapid paced work environment. The candidate should have a proven track record of working effectively with managers, supervisors, and engineers across different organizations to achieve business goals in a quickly changing wafer fab environment.

The ability to visualize, troubleshoot, and continuously improve the complex system interactions at an automated 300mm semiconductor wafer fabrication facility is key to being successful in this position.

Responsibilities Include

- Develop automated jobs to optimize lot dispatching and scheduling, material movement, and task automation.
- Work closely with stakeholders to understand and address factory challenges.
- Leverage background data collection and analytics in automated decision making.
- Mastery of computer skills and software required of the role.
- Ability to troubleshoot complex engineering problems.
- Effective time management to drive parallel projects to completion in an accurate and timely manner.
- Effectively communicate impact of changes to stakeholders and leadership. Ability to assess emerging technologies and software solutions relevant to industrial and systems engineering, and integrate them into our operations to stay at the forefront of industry best practices.

Qualifications

Minimum Requirements

Bachelor's degree in Industrial Engineering, Systems Engineering, Electrical Engineering, Computer Engineering, Computer Science or related degree2 years of experience in either Semiconductor Manufacturing or High Volume Manufacturing.Ability to work in a clean room environment wearing a smock

Preferred Qualifications

- Experience developing a workflow solution.
- Experience with workflow platforms.
- Front-end semiconductor manufacturing experience is valued.
- Experience with Applied Materials SmartFactory software suite and/or Activity Manager for Reporting (AMR) or Automation (AMA) is a plus.
- Experience developing dispatching and scheduling logic with Real-Time Dispatch (RTD).
- Proficient with Python or Shell scriptingFamiliarity with Linux server environments and Git version control.
- Experience with querying data with SQL and creating reports in platforms such as Spotfire, PowerBI, Tableau, or Excel & VBA.Base understanding of complexities behind material movement using Automated Material Handling Systems (AMHS).
- Team player - must be able to work effectively across functional and cultural boundaries.
- Ability to build and sustain strong relationships with peers during difficult and stressful situations, while negotiating and driving to solutions.
- Strong communication skills. Ability to communicate effectively across functional boundaries and with upper management.
- Must be comfortable working in a clean room environment wearing cleanroom required garments.“Out of the box” thinking.

About Us

Why TI?

The future starts here. As a TIer, you'll play a critical role in defining the next era of semiconductor technology and help create the innovations that shape the world around us.Surround yourself with a team of innovators who value your unique perspective and will challenge you to bring your best self to work every day. We believe that fostering a culture of collaboration fuels both personal growth and technological breakthroughs. Explore our company culture .At TI, your success goes beyond your work. Take advantage of comprehensive benefits designed to support your total well-being at

work and in life, from competitive compensation to extensive health coverage and wellness programs. Learn more about our benefits offerings .

About Texas Instruments

Texas Instruments Incorporated (Nasdaq: TXN) is a global semiconductor company that designs, manufactures and sells analog and embedded processing chips for markets such as industrial, automotive, data center, personal electronics and communications equipment. At our core, we have a passion to create a better world by making electronics more affordable through semiconductors. This passion is alive today as each generation of innovation builds upon the last to make our technology more reliable, more affordable and lower power, making it possible for semiconductors to go into electronics everywhere. Learn more at TI.com .

Texas Instruments is an equal opportunity employer and supports a diverse, inclusive work environment. All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, disability, genetic information, national origin, gender, gender identity and expression, age, sexual orientation, marital status, veteran status, or any other characteristic protected by federal, state, or local laws.

If you are interested in this position, please apply to this requisition.

About The Team

TI does not make recruiting or hiring decisions based on citizenship, immigration status or national origin. However, if TI determines that information access or export control restrictions based upon applicable laws and regulations would prohibit you from working in this position without first obtaining an export license, TI expressly reserves the right not to seek such a license for you and either offer you a different position that does not require an export license or decline to move forward with your employment.
