Job Description

As the Engineer - Industrial, you will be responsible for supporting the Engineering team in driving operational efficiency, labor productivity, and optimized product flow across fulfillment operations. You will be accountable for contributing to the design and continuous improvement of facility layouts, labor standards, and process engineering initiatives.

Responsibilities

Assist in the development, governance, and maintenance of engineered labor standards across fulfillment processesConduct time studies and activity-level labor modeling to support productivity improvements Support facility layout design and workflow optimization for new builds, retrofits, and expansions Collaborate with cross-functional teams

(IT, Operations, Lean, Analytics) to evaluate the labor impact of WMS changes including slotting, task logic, and pick pathsParticipate in continuous improvement initiatives by embedding labor standards and validating performance against benchmarksAnalyze data to support labor forecasting, productivity tracking, and performance reportingContribute to the development of scalable process solutions that enhance throughput and space utilization

Qualifications

Bachelors Degree – Industrial Engineering, Supply Chain, or related field requiredMasters Degree – MBA preferredLEAN Six Sigma designation preferredAlteryx experience highly preferred, ideally supporting labor management, warehouse operations, productivity analytics, or other industrial engineering applications2 years of experience in industrial or operations engineering environmentExperience working in fulfillment or distribution environmentFamiliarity with time study techniques and labor standard developmentUnderstanding of WMS/LMS systems and their impact on labor and process efficiency Experience with facility layout and process design tools (e.g., AutoCAD, simulation software)Exposure to Lean and Six Sigma methodologies Analytical mindset with strong problem-solving abilitiesProficiency in data analysis tools (Excel, SQL, or similar) Effective communication and collaboration skills across cross-functional teamsAbility to manage multiple projects and prioritize tasks in a fast-paced environmentDetail-oriented with a focus on continuous improvement Ability to travel 25% - 50%

Working Environment: Warehouse – Work is generally performed in a warehouse environment. The noise level is moderately quiet. Generally well ventilated and well lighted. Warehouse employees may be exposed to all kinds of weather and may be required to wear protective clothing. Operates heavy equipment. Strict safety regulations may be required.

Compensation Details: $74,285 - $118,856 Annually

This amount is what we reasonably believe we will pay for the position; however, offer amounts may vary based on factors such as geographic location, relevant education, experience, qualifications, skills, shift, or any collective bargaining agreements.

For eligible positions, compensation may include participation in a bonus or sales incentive plan, subject to the terms and conditions of the applicable plan documents. For certain sales roles, Wesco also offers a commission structure that provides additional compensation based on sales results, as defined by the applicable commission plan.

In addition, Wesco offers a benefits program for eligible employees, which may include paid time off, medical, dental, and vision coverage, and retirement savings plans. Additional details about benefits are available here .

About The Team
